WebSocket Server Demo

解壓縮後直接執行 WebSocket.exe,若遇防火牆權限請點允許。 執行之後畫面中應會顯示

WebSocket server started on ws://localhost:7777/Chat

此時 Server 已經啟用,若在正確位址收到訊息將會於畫面中顯示,所有訊息都會帶上時間標記若以其他裝置連線,或是連線時出現問題,可以試著將 localhost 更改為運行執行檔主機的 IP 位址若須清除畫面中的訊息,可點擊畫面下方的Clear

訊息分類

1. Server建立成功

WebSocket server started on ws://localhost:7777/Chat WebSocket server listening...

2. 收到 Client 連接訊息

client connected from: [IP 位置] [port]

3. 收到 Client 離線訊息

client disconnected from: [IP 位置] [port]

4. 收到一般訊息

Message contnet

示意圖

WebSocket Server Received Messages:
